

Product Information

Triose phosphate Isomerase

Cat. No.: X23-06-YM114

Size: 1 mg; 5 mg; 10 mg

Synonym: Phosphotriose isomerase; Triose phosphate mutase; Triosephosphate isomerase

This product is for research use only and is not intended for diagnostic use.

Product Information

Description	Triose phosphate isomerase is responsible for catalyzing the reversible transformation of the triose phosphate isomers dihydroxyacetone phosphate and D-glyceraldehyde 3-phosphate.
Form	Solid
Applications	Triose phosphate isomerase can be used as a model system for researching transfer reactions, enzyme activities, and metabolic disorders.
