

Product Information

β-Glucosyltransferase

Cat. No.: X23-06-YM150

Size: 500 U; 1000 U; 1500 U

Synonym: Hydroxymethyl cytosine

This product is for research use only and is not intended for diagnostic use.

Product Information

Description	β-Glucosyltransferase is responsible for transferring the glucose group of uridine diphosphate glucose to 5-hydroxymethylcytosine residues in double-stranded DNA, producing β-glucosyl-5-hydroxymethylcytosine.
Form	Solid
Applications	β-Glucosyltransferase is useful for se-specific detection of 5-hmC.
