

## Product Information

### Recombinant human alpha *N*-acetylgalactosaminidase from *E. coli*

**Cat. No.:** X23-06-YM166

**Size:** 10 µg; 50 µg; 200 µg

**Enzyme Commission Number:** 3.2.1.49

**Synonym:** NAGA

**This product is for research use only and is not intended for diagnostic use.**

#### Product Information

<b>Description</b>	Recombinant human alpha <i>N</i> -acetylgalactosaminidase from <i>E. coli</i> is an exoglycosidase that plays a key role in hydrolyzing the terminal, non-reducing $\alpha$ - <i>N</i> -acetylgalactosamine residues from oligosaccharides and <i>N</i> -glycans combined to proteins.
<b>Molecular Weight</b>	23.6 kDa
<b>Source</b>	Recombinant <i>E. coli</i>
<b>Form</b>	Lyophilized powder
<b>Purity</b>	≥95%
<b>Applications</b>	Recombinant human alpha <i>N</i> -acetylgalactosaminidase from <i>E. coli</i> can be used in ELISA, Western Blot, immunoprecipitation, and SDS-PAGE.
<b>Storage</b>	Store at -80°C.
