

Product Information

Recombinant mouse alpha *N*-acetylgalactosaminidase from *E. coli*

Cat. No.: X23-06-YM167

Size: 10 µg; 50 µg; 200 µg

Enzyme Commission Number: 3.2.1.49

Synonym: NAGA

This product is for research use only and is not intended for diagnostic use.

Product Information

Description	Recombinant mouse alpha <i>N</i> -acetylgalactosaminidase from <i>E. coli</i> is an exoglycosidase that plays a key role in hydrolyzing the terminal, non-reducing α - <i>N</i> -acetylgalactosamine residues from oligosaccharides and <i>N</i> -glycans combined to proteins.
Molecular Weight	24.2 kDa
Source	Recombinant <i>E. coli</i>
Form	Solid
Purity	≥95%
Applications	Recombinant mouse alpha <i>N</i> -acetylgalactosaminidase from <i>E. coli</i> can be used in ELISA, Western Blot, immunoprecipitation, and SDS-PAGE.
Storage	Store at -80°C.
