

Product Information

Mid-temperature alpha-amylase, Liquid, 2,000 U/mL

Cat. No.: X23-06-YM199

Size: 25 kg; 50 kg; 75 kg

Synonym: Mid-temperature α -amylase

This product is for research use only and is not intended for diagnostic use.

Product Information

Description	Mid-temperature alpha-amylase rapidly hydrolyzes the refined α -1,4 glucosidic bonds of starch molecules, and arbitrarily cut off the short bond dextrans and a small number of oligosaccharides of different lengths from the inside of starch molecules, so that the viscosity of the starch slurry decreased rapidly.
Form	Liquid
Applications	Mid-temperature alpha-amylase is applied in the detergent industry, fuel alcohol production, textile, and paper industries.
Storage	Store at 4°C. Protect from light.
