

Product Information

Recombinant human hyaluronidase 2 from Chinese hamster ovary

Cat. No.: X23-06-YM279

Size: 20 µg; 100 µg; 200 µg

Synonym: HYAL2

This product is for research use only and is not intended for diagnostic use.

Product Information

Description	Recombinant human Hyaluronidase 2 from Chinese hamster ovary is a class of five <i>endo</i> -beta- <i>N</i> -acetylhexosaminidases that hydrolyzes high molecular weight hyaluronic acid of extracellular matrix to intermediate and small-sized products.
Molecular Weight	53-58 kDa
Source	Chinese hamster ovary
Form	Solution
Purity	>90%, determined by SDS-PAGE.
Applications	Recombinant human hyaluronidase 2 from Chinese hamster ovary can be used for its activity on both hyaluronan and chondroitin sulfate.
Storage	Store at -20°C.
