

Product Information

Recombinant mouse chitinase 3-like 1 from mouse myeloma cell

Cat. No.: X23-06-YM288

Size: 50 µg; 100 µg; 200 µg

Synonym: CHI3L1

This product is for research use only and is not intended for diagnostic use.

Product Information

Description	Recombinant mouse chitinase 3-like 1 from mouse myeloma cell is a glycosyl hydrolase that is secreted from cultured articular chondrocytes, synovial cells, and activated monocyte-derived macrophages.
Molecular Weight	38-41 kDa
Source	Mouse myeloma cell
Form	Solution
Purity	>95%, determined by SDS-PAGE.
Applications	Recombinant mouse chitinase 3-like 1 from mouse myeloma cell is useful for the investigation of asthma and cancer.
Storage	Store at -20°C.
