

Product Information

Recombinant human chitinase 3-like 2 from mouse myeloma cell

Cat. No.: X23-06-YM290

Size: 50 µg; 100 µg; 200 µg

Synonym: CHI3L2

This product is for research use only and is not intended for diagnostic use.

Product Information

| | |
|-------------------------|---|
| Description | Recombinant human chitinase 3-like 2 from mouse myeloma cell is a member of the glycosyl hydrolase that is secreted by synovial fibroblasts, chondrocytes, and TGF beta/IL-4-stimulated monocyte-derived macrophages. |
| Molecular Weight | 40 kDa |
| Source | Mouse myeloma cell |
| Form | Solution |
| Purity | >95%, determined by SDS-PAGE. |
| Applications | Recombinant human chitinase 3-like 2 from mouse myeloma cell can be used for its role as a potential biomarker for osteoarthritis. |
| Storage | Store at -20°C. |
