

Product Information

Recombinant human hexosaminidase B from Chinese hamster ovary

Cat. No.: X23-06-YM292

Size: 20 µg; 100 µg; 200 µg

Synonym: HEXB

This product is for research use only and is not intended for diagnostic use.

Product Information

Description	Recombinant human hexosaminidase B from Chinese hamster ovary plays a key role in the hydrolysis of terminal <i>N</i> -acetyl-D-hexosamine residues in GM2 gangliosides and globo-sphingolipids in lysosomes.
Molecular Weight	59-70 kDa
Source	Chinese hamster ovary
Form	Solution
Applications	Recombinant human hexosaminidase B from Chinese hamster ovary can be used for Tay-Sachs disease.
Storage	Store at -20°C.
