

Product Information

FA2G2 N-glycan-BrAc

Cat. No.: X23-10-YW110

Size: 1 mg; 5 mg; 10 mg

Synonym: FA2G2; G2F; NA2F; (Gal)₂(GlcNAc)₂(Man)₃(Fuc)(GlcNAc)₂; Gal β (1-4)GlcNAc β (1-2)Man α (1-3)[Gal β (1-4)GlcNAc β (1-2)Man α (1-6)]Man β (1-4)GlcNAc β (1-4)[Fuc α (1-6)]GlcNAc

This product is for research use only and is not intended for diagnostic use.

Product Information

Molecular Weight	1907.59
Molecular Formula	C ₇₀ H ₁₁₆ N ₅ O ₅₀
Form	Solid
Purity	>90%, determined by HPLC.
Applications	FA2G2 bromoacetamide (BrAc) type N-glycan is a glycosylation reagent with a reducing end bromoacetamide group that can be used to glycosylate peptides or proteins through cysteine-free thiol groups.
Storage	Store at -20°C.
