

## Product Information

### Heparan sulfate, NS-NA 8-Mer-Azido A

**Cat. No.:** X23-09-LXQ234

**Size:** 100 µg; 200 µg; 500 µg

**Synonym:** Heparan sulfates; NS-NA 8-Mer A

**This product is for research use only and is not intended for diagnostic use.**

#### Product Information

|                          |                                                                                                                                                                             |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>       | Heparan sulfate (NS-NA 8-Mer-Azido A) has a molecular weight of 1841.60 g/mol and a purity >99%. It carries a <i>para</i> -(6-azido hexanamido) phenyl tag at reducing end. |
| <b>Molecular Weight</b>  | 1841.60 g/mol                                                                                                                                                               |
| <b>Molecular Formula</b> | $C_{64}H_{96}N_8O_{50}S_2$                                                                                                                                                  |
| <b>Purity</b>            | >99%, determined by HPLC.                                                                                                                                                   |
| <b>Applications</b>      | Heparan sulfate (NS-NA 8-Mer-Azido A) with a molecular weight of 1841.60 g/mol is a valuable tool for the study of complex molecular interactions.                          |
| <b>Storage</b>           | Stored at -20°C. Avoid repeated freeze-thaw cycles.                                                                                                                         |
