

## Product Information

### Heparan sulfate, 6S 9-Mer-Fluorescein

**Cat. No.:** X23-09-LXQ292

**Size:** 100 µg; 200 µg; 500 µg

**Synonym:** Heparan sulfates; 6S 9-Mer FL

**This product is for research use only and is not intended for diagnostic use.**

#### Product Information

|                          |                                                                                                                                                                                             |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>       | Heparan sulfate (6S 9-Mer-Fluorescein) has a molecular weight of 2827.4 g/mol and facilitates precise investigations of structural features and biological functions of glycosaminoglycans. |
| <b>Molecular Weight</b>  | 2827.4 g/mol                                                                                                                                                                                |
| <b>Molecular Formula</b> | $C_{90}H_{115}N_9O_{78}S_8$                                                                                                                                                                 |
| <b>Applications</b>      | Heparan sulfate (6S 9-Mer-Fluorescein) with a molecular weight of 2827.4 g/mol is a valuable tool for the study of complex molecular interactions.                                          |
| <b>Storage</b>           | Stored at -20°C. Avoid repeated freeze-thaw cycles.                                                                                                                                         |
