

## Product Information

### B Antigen Cer (d18:1/8:0)

**Cat. No.:** X23-11-ZQ243

**Size:** 100 mg; 500 mg; 1 g; 100 g; 1 kg

**Synonym:** Gal $\alpha$ (1-3)[Fuc $\alpha$ (1-2)]Gal $\beta$ (1-4)Glc $\beta$ -ceramide

**This product is for research use only and is not intended for diagnostic use.**

#### Product Information

|                          |                                                                                                                                                                   |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Molecular Weight</b>  | 1058.26                                                                                                                                                           |
| <b>Molecular Formula</b> | C <sub>50</sub> H <sub>91</sub> NO <sub>22</sub>                                                                                                                  |
| <b>Form</b>              | Powder                                                                                                                                                            |
| <b>Applications</b>      | B Antigen Cer (d18:1/8:0) is a glycolipid subtype that can be used as a useful standard for the detection of major structural components in biological materials. |
| <b>Storage</b>           | Store at -20°C.                                                                                                                                                   |
