

Product Information

CM-dextran, MW 4,000 Da

Cat. No.: X24-04-XQ025

Size: 5 g

MDL: MFCD00146477

CAS Number: 39422-83-8

This product is for research use only and is not intended for diagnostic use.

Product Information

Description	CM-dextran is a dextran derivative characterized by carboxymethyl groups attached, enhancing its water solubility and reducing its bioavailability. It is a high-quality product with a molecular weight of 4,000 Da.
Molecular Weight	4,000 Da
Applications	CM-dextran with the molecular weight of 4,000 Da can be used for the study in bioengineering due to its biocompatibility, making it ideal for use in developing biologically interactive materials and substances.
Storage	Store at room temperature.
