

Product Information

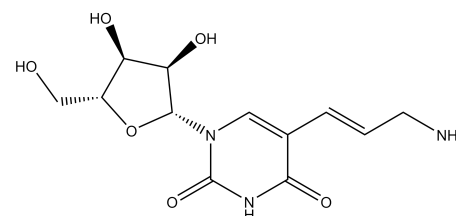

Modified nucleoside 5-amineallyl-Ur

Cat. No.: X24-08-LY236

Size: 5 mg; 10 mg; 25 mg; 100 mg

Synonym: 5-Amineallyl-uridine

This product is for research use only and is not intended for diagnostic use.

Product Information

Description	5-Amineallyl-Ur is a uridine analog with an aminopropenyl functional group.
Molecular Weight	299.28
Molecular Formula	C ₁₂ H ₁₇ N ₃ O ₆
Form	Powder
Purity	≥95%
Applications	5-Amineallyl-Ur can be used as a precursor for bioactive molecules and can be used to synthesize novel bioactive molecules or drugs.
Storage	Store at -20°C.

Safety Information

Personal Protective Equipment	Gloves, eyeshields, N95 mask
