

Product Information

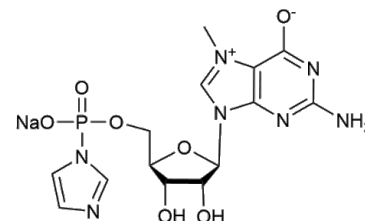

N7-Me-GMP·IM

Cat. No.: X24-09-LY380

Size: 1 mg; 2 mg; 5 mg; 10 mg

Synonym: N1-Methyl-guanosine-5'-monophosphate, Imidazolite

This product is for research use only and is not intended for diagnostic use.

Product Information

Description	N7-Me-GMP·IM is a modified nucleotide containing primarily an N7-methylguanosine and an imidazole ligand.
Molecular Weight	449.29
Molecular Formula	C ₁₄ H ₁₇ N ₇ NaO ₇ P
Purity	≥95%
Applications	N7-Me-GMP·IM can be used to study the modification of RNA and its effects on RNA structure and function.
Storage	Store at -20°C.
