

Product Information

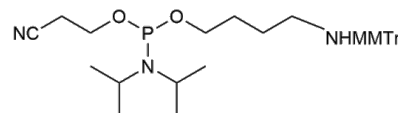

NHMMTr-C4 phosphoramidite

Cat. No.: X24-09-LY385

Size: 1 mg; 2 mg; 5 mg; 10 mg

Synonym: Monomethoxytrityl-butylamine-linker phosphoramidite

This product is for research use only and is not intended for diagnostic use.

Product Information

| | |
|--------------------------|--|
| Description | NHMMTr-C4 phosphoramidite is a commonly used phosphoramidite compound with substituents of 4 carbon chains. |
| Molecular Weight | 561.71 |
| Molecular Formula | C ₃₃ H ₄₄ N ₃ O ₃ P |
| Form | Colorless to light yellow oil, free from visible foreign matter |
| Purity | ≥97%, determined by UPLC. |
| Applications | NHMMTr-C4 phosphoramidite can be used for the synthesis of oligonucleotides, especially in the synthesis of complex sequences. |
| Storage | Store at -20°C. |
