

Product Information

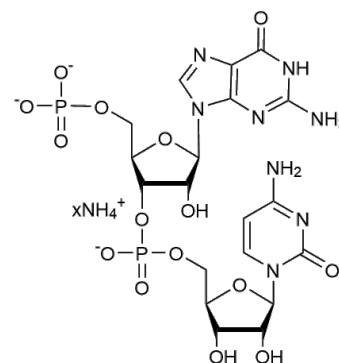

pGmpC, NH₄ salt

Cat. No.: X24-09-LY403

Size: 1 mg; 2 mg; 5 mg; 10 mg

Synonym: pGmpC, ammonium salt

This product is for research use only and is not intended for diagnostic use.

Product Information

Description	pGmpC is a nucleotide analogue, which contains a phosphoramidite bond.
Molecular Weight	668.4
Molecular Formula	C ₁₉ H ₂₆ N ₈ O ₁₅ P ₂
Form	White, off-white to faint yellow powder
Purity	≥97%, determined by HPLC.
Applications	pGmpC is used for the synthesis of specific oligonucleotides and has important applications in genomics research and biotechnology.
Storage	Store at -20°C.
