

Product Information

6-Hexanoylamino-4-methylumbelliferyl β -D-galactopyranoside, Purity 95%

Cat. No.: X25-01-LY143

Size: 100 mg; 250 mg; 500 mg; 1 g; 5 g

Synonym: Fluorogenic substrates; Enzyme substrates

This product is for research use only and is not intended for diagnostic use.

Product Information

Description	6-Hexanoylamino-4-methylumbelliferyl β -D-galactopyranoside is a MU substrate with a hexanamide chain.
Form	Power
Purity	0.95
Applications	6-Hexanoylamino-4-methylumbelliferyl β -D-galactopyranoside can be used as a chromogenic substrate for beta-galactosidase.
Storage	Store at -20°C.
