

Product Information

Pentafluorophenyl agent, Chondroitin sulfate-pentafluorophenyl, Purity $\geq 95\%$

Cat. No.: X25-05-YM075

Size: 100 mg; 250 mg; 500 mg; 1 g; 5 g

Synonym: Pentafluorophenyl-chondroitin sulfate; Pentafluorophenyl-chondroitin sulfate; Chondroitin sulfate-pentafluorophenyl

This product is for research use only and is not intended for diagnostic use.

Product Information

Description	Pentafluorophenyl-chondroitin sulfate active ester is synthesized using pentafluorophenol activation, facilitating efficient amine coupling under mild aqueous conditions.
Glycan Name	Chondroitin sulfate
Glycan Structure	The glycan structure of chondroitin sulfate (CS) is a sulfated glycosaminoglycan (GAG) composed of repeating disaccharide units. Each unit consists of: N-acetyl-D-galactosamine (GalNAc) ($\beta 1 \rightarrow 4$ linked) D-glucuronic acid (GlcA) ($\beta 1 \rightarrow 77$ linked)
Source	Chemical synthesis
Functional Group	Pentafluorophenyl
Form	Solid or powder
Purity	$\geq 95\%$
Impurities	No visible impurities to the naked eye.
Solubility	This product is soluble in most organic solvents, such as DCM, DMF, DMSO, and THF, and exhibits excellent solubility in water.
Identity	Confirmed by NMR.
Stability	It is stable under its storage temperature.
Quality Level	Research level
Applications	Chondroitin sulfate-pentafluorophenyl can be used for its potential to develop maleimide-thiol conjugates for stable protein-polymer linkages.
Storage	Store at -20°C , protect from light and moisture.
