

## Product Information

### Targeted doxorubicin-loaded liposomes

**Cat. No.:** X26-05-ZQ2545

**Size:** 100 mg; 250 mg; 500 mg; 1 g; 5 g

**Synonym:** Targeted DOX-loaded LPs; Targeted doxorubicin liposomes; Targeted DOX liposomal nanocarriers

**This product is for research use only and is not intended for diagnostic use.**

#### Product Information

<b>Description</b>	This advanced engineered system features ligand-functionalized doxorubicin liposomes. The structural framework encapsulates the hydrophilic anthracycline doxorubicin within its central aqueous core <i>via</i> an active remote-loading ammonium sulfate or citrate gradient matrix. Its exterior boundary is surface-modified with specific affinity ligands linked <i>via</i> polymer anchors, altering the interfacial water structure and surface charge topography to establish a dense target-mimetic ligand array that completely prevents physical vesicle aggregation.
<b>Source</b>	Custom synthesis
<b>Functional Group</b>	Doxorubicin
<b>Form</b>	Solid or powder
<b>Purity</b>	≥95%
<b>Impurities</b>	No visible impurities to the naked eye.
<b>Identity</b>	HPLC/MS/NMR
<b>Stability</b>	This product is stable for one year when stored at the recommended temperature in lyophilized powder.
<b>Quality Level</b>	Research grade
<b>Storage</b>	Store at -20°C.
